

THINKING WITH NATURE

We love to think about the natural world, and what better place to do that than *in* nature. What will happen when we explore the world of ideas at the same time as we explore the nature around us?

SAPERE's Thinking With Nature is a 1-day introduction to Philosophy for Children and Communities (P4C) in an outdoor setting.

What is unnatural? What does it mean to love a place? Is nature a resource? Can we 'save' the planet? What do we owe the future?

Explore the natural world and the philosophical questions it raises using the powerful pedagogy of P4C.
